QUALITY POLICY STATEMENT

The main scope of the company is profitability. To pursue this objective, the Management aims to satisfy the customer by providing a product / service correspondent to his expectations.
The Management therefore believes that Quality is an essential part of the business system and represents the extent which the product / service meets the customer's needs to.

The Management plans to confirm its strategy regarding identification of the expectations and needs of the market through the continuous improvement of the Quality System in compliance with the requirements of the UNI EN ISO 9001 ed. 2015.

The Management intends and undertakes to achieve the following objectives:
• the response to contractual requirements;
• the satisfaction of the Client's expectations;
• maintaining the adequacy of the System and its continuous improvement;
• develop skills with adequate training and qualification of personnel;
• provide adequate means for achieving and maintaining the fixed objectives.

All specific and measurable objectives over time, correlatable to the quality of the product / service developed within the company activities, will be analyzed, established and disclosed during the Quality System Reviews conducted by the Management.

This necessarily entails the active implication of all the personnel who carry out and verify activities that affect the quality of the products / services offered.
The single individual who is part of the BARIN organization must be enabled to understand and be able to perform the tasks entrusted to him, must be personally responsible for the quality of his work and has the duty to commit himself to the acquisition of the knowledge necessary for a correct performance as part of its business.

The sharing of the Quality System is the responsibility of all staff and is supported by the constant commitment of the Management.
The Management with the collaboration of Quality System General Manager is responsible for the continuous verification of the application status of the System.
